Reasons for Allowance

The following is an examiner's statement of reasons for allowance:

Applicants claim a ring-opened cycloolefin copolymer which contains a structural unit (A) derived from a specific tricyclomonoolefin, in which a proportion of an endo form isomer is at least 80 mol %, and a structural unit (B) derived from a specific tetracyclododecene or hexacycloheptadecene having at least one defined ester group [claim 1, General formula (2)], in a molar proportion of 10:90 to 70:30. Applicants further claim a process for producing a ring-opened cycloolefin copolymer comprising the step of ring-opening polymerization of a monomer composition composed of the corresponding tricycloolefin compound [claim 6, general formulae (3-1), (3-2), (3-3)] containing the same proportion of endo form and the corresponding tetracyclododecene or hexacycloheptadecene monomer, in the same molar proportion [claim 6, General formula (4)].

A thorough search of the relevant art has revealed no prior art that can be used, either singularly or in combination, to render the ring-opened cycloolefin copolymer or production process as here claimed anticipated or obvious to a person having ordinary skill in the art at the time the invention was made.

Accordingly, claims 1-8 are deemed to define allowable subject matter and passed to issue.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably
